

CROSSING SAFETY IMPROVEMENT PROGRAM

FY 2005-2009 Plan

PROPOSED GRADE CROSSING PROTECTION FUND
PROJECTS FOR LOCAL ROADS AND STREETS

ILLINOIS COMMERCE COMMISSION
JULY, 2004

INTRODUCTION

The Illinois Commerce Commission has the statutory responsibility to improve safety at public highway-rail crossings in the State of Illinois. Currently, there are 8,524 highway-rail *grade* crossings in Illinois, of which 849 are on state roads, and 7,675 are on local roads. There are 2,733 highway-rail *grade-separated* crossings (bridges) in the state. Another 4,746 grade crossings are on private property, which are not under the jurisdiction of the state, and there are also 163 private bridge structures. There are also 281 pedestrian grade crossings and 76 pedestrian grade separated crossings (bridges) in Illinois. Nationally, Illinois is second only to Texas in the total number of highway-rail crossings. Table A summarizes the distribution of highway-rail crossings by type and position.

Table A
Illinois Crossings

Crossing Type	Crossing Position	Crossings
Public Roadway	At Grade	8,524
	RR Over Roadway	1,824
	RR Under Roadway	909
Pedestrian Pathway	At Grade	281
	RR Over Pathway	54
	RR Under Pathway	22
Total		11,614

The Commission orders safety improvements at public highway-rail crossings with the cost of such improvements paid by the state, the railroads, and local governments. On state roads, the Illinois Department of Transportation (IDOT) pays the majority of the costs through the State Road Fund. For local roads, the legislature created the Grade Crossing Protection Fund (Fund) to bear the majority of the costs of improvements.

RAILROAD CROSSING SAFETY — THE THREE E's

Illinois is one of the key transportation hubs in the nation. With over 7,200 miles of railroad track, its rail system is the country's second largest, including the largest rail freight hub in Chicago. Illinois has the nation's third largest highway system, with 139,744 miles of highways, streets and roads and 25,529 bridges.

Both the rail and highway systems are among the most heavily used in the nation in terms of volume of traffic, with much of the traffic concentrated in the Chicago metropolitan region. There, the urban mass transit system serves an average of nearly 600 million passengers a year over an extensive network of bus and rail routes.

Keeping the grade crossing portion of this transportation network operating safely and efficiently involves local, state and federal governments as well as the private

sector. These safety efforts can be summarized as the Three E's — **Education, Engineering and Enforcement.**

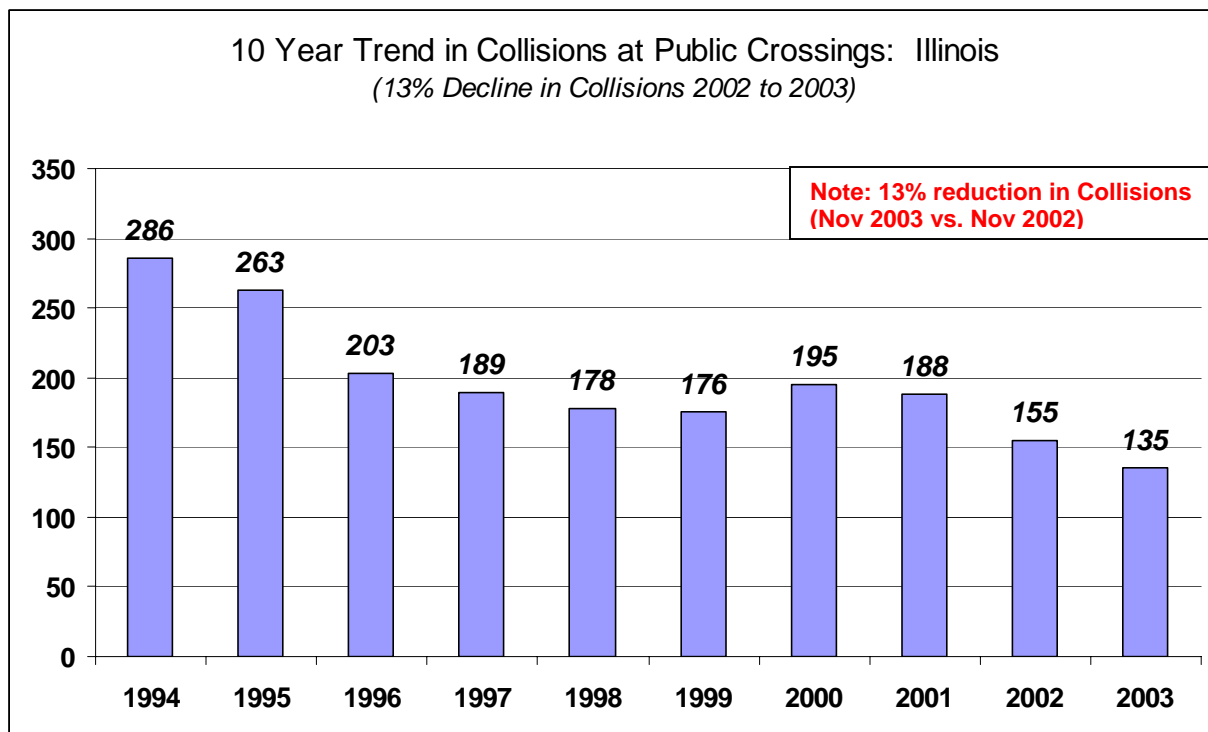

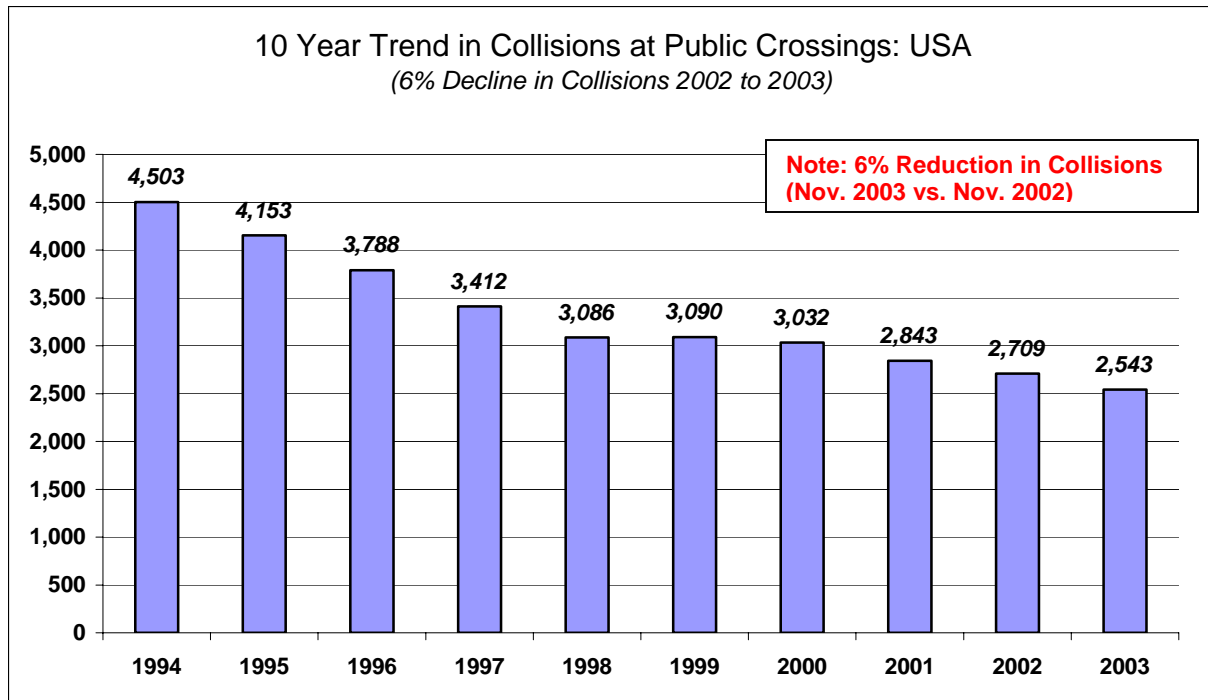

Education: The Commerce Commission is actively involved in developing programs to educate the public about the danger at grade crossings. One example of this public education program is the ICC's participation in Operation Lifesaver. The Operation Lifesaver program is a public-private partnership designed to increase public awareness of highway-rail grade crossing hazards. It also strives to improve driver and pedestrian behavior at railroad crossings by encouraging compliance with traffic laws relating to crossing signs and signals.

Enforcement: Enforcement of existing traffic and trespass laws is key, especially the issuance of fines (up to \$500) or community service to persons crossing railroad tracks after the warning signals have activated.

Engineering: Grade crossing safety improvements are also critical to reducing collisions. The Commission orders physical and system improvements, including the installation and upgrading of grade crossing warning signs and signals and, where warranted, grade separations. While education and enforcement are absolutely essential, the focus of this report is the engineering of capital improvements to further railroad crossing safety on local roads.

2003 IN REVIEW - Collision and Fatality Rates

In 2003, there were a total of 135 collisions at public crossings in Illinois, a 13 percent reduction compared to 2002 figures, and a record year for fewest crossing collisions (with the next closest year being 2002 when there were 155 collisions). National figures for 2003 indicate 2,543 collisions occurred, compared to 2,709 in 2002, which is a 6.1 percent decrease. As can be seen from the following charts, the trend both nationally and in Illinois is a steady decrease in collisions.

The general public commonly thinks of grade crossing collisions as involving trains colliding with cars, and in a majority of incidents that is the case. However, each year a substantial number of collisions involve motor vehicles driving into the sides of

trains. In 2003 over 25 percent of all collisions involved cars driving into the sides of trains, a percentage which has remained fairly constant over the years. The 34 vehicle-train collisions in 2003 resulted in six fatalities and 19 injuries, including one pedestrian.

Total fatalities resulting from collisions at highway-rail crossings in Illinois increased from 23 in 2002 to 29 in 2003. Fatality statistics, however, are not a particularly good measure of safety. Fatalities are a function of random events, such as how many occupants were riding in a car involved in a collision, or multiple fatalities involved in the same incident (as in the death of eleven passengers involved in the Amtrak/steel truck collision that occurred near Bourbonnais, in 1999). Table B illustrates the distribution of fatalities by collision type in 2003.

Table B
Illinois Highway/Rail Grade Crossing Collisions

Type of Collision	Total Collisions	Fatal Collisions	Total Fatalities
Train Struck Vehicle	90	16	16
Vehicle Struck Train	33	4	5
Pedestrian	12	8	8
Total	135	28	29

Note: One collision that occurred in 2003 resulted in two fatalities.

RAILROAD CROSSING SAFETY FUNDING

The Grade Crossing Protection Fund (Fund), appropriated to the Illinois Department of Transportation but administered by the Illinois Commerce Commission, was created by the General Assembly to assist local jurisdictions (counties, townships and municipalities) in paying for safety improvements at railroad crossings on local roads. Assistance from the Fund cannot be used for crossing safety improvements on the state road or highway system. Those improvements are funded directly by the Illinois Department of Transportation. Each month \$2.25 million in state motor fuel tax receipts is transferred from the motor fuel tax fund to the Grade Crossing Protection Fund. This amount provides the Fund with \$27 million annually to be used for safety improvements at highway/rail crossings on local roads and streets. The Fund is typically used to help pay for the following types of projects:

- **Warning Device Upgrades:** Installation of automatic flashing light signals and gates at public grade crossings currently not equipped with automatic warning devices; installation of automatic flashing light signals and gates at public grade crossings currently equipped only with automatic flashing light signals; signal circuitry improvements at public grade crossings currently equipped only with automatic warning devices;
- **Grade Separations - New and Reconstructed:** Construction, reconstruction, or repair of bridges carrying a local road or street over railroad tracks (overpass); construction, reconstruction, or repair of bridges carrying railroad tracks over a local road or street (subway);

- **Grade Separations - Vertical Clearance Improvements:** Lowering the existing highway pavement surface under a railroad bridge to improve vertical clearance for motor vehicles;
- **Pedestrian Grade Separations:** Construction of a bridge to carry pedestrian/bicycle traffic over or under railroad tracks;
- **Interconnects:** Upgrading the circuitry at grade crossings where warning signals are connected to the adjacent traffic signals so that the two systems operate in a synchronized manner;
- **Highway Approaches:** Improvements to the portion of the public roadway directly adjacent to the crossing surface;
- **Connecting Roads:** Construction of a roadway between a closed crossing and an adjacent open, improved crossing; and
- **Remote Monitoring Devices:** Sensor devices in the circuitry of grade crossing warning devices which immediately alert the railroad to any failures in warning device operations
- **Low Cost Improvements at Unsignalized Crossings:** Installation of new, more reflective crossbuck warning signs and YIELD signs at crossings that do not require automatic warning devices.

The cost of railroad crossing safety improvements varies substantially depending on the nature of the work undertaken. A standard installation of gates with automatic flashing light signals on a two-lane road typically costs approximately \$150,000. Additional costs for road improvements could typically range from \$2,000 to \$25,000 depending on the road type and location. Grade separation structures are very costly. A pavement lowering project can cost \$350,000 - \$1 million, while a new underpass could cost as much as \$40 million. Bridges over railroads can cost from \$400,000 for a rural structure to \$40 million for a multi-lane multi-railroad urban structure. Typically, the Fund pays up to 60% of the cost for grade separation projects and 85% to 95% for grade crossing improvements, although Commission policy is to allocate no more than \$12 million of Grade Crossing Protection Funds to any individual project unless unusual circumstances warrant. When the numbers of crossings needing improvement are multiplied by project costs, the problem of allocating sufficient assistance from the Grade Crossing Protection Fund becomes apparent.

CROSSING SAFETY IMPROVEMENT PROJECTS

This report presents the railroad crossing safety capital improvements the Commerce Commission staff proposes to implement during FY 2005 and also looks ahead to the projects contemplated for the years FY 2006 - FY 2009. In all cases it is assumed that any required local funding match will be available. In some cases local funding may not be available during the same fiscal year in which a crossing improvement has been programmed. In those circumstances the Commission will move the project to another fiscal year to accommodate the local agency.

The project list for Fiscal Year (FY) 2005 (July 1, 2004 through June 30, 2005) includes capital improvement projects that local governments or railroads have previously submitted to the Commission for evaluation and approval, as well as projects

based on established priorities. The project list for FY 2006-2009 (out-year list) include projects based on a continued effort to meet those established priorities:

- High Collision History - Each year the Commission places a high priority on upgrading public highway/rail grade crossings which have a pronounced history of train/vehicle collisions, or which have a high predictive value for future collisions. The FY 2004-2008 Plan will address safety improvements at as many of these crossing locations as possible.
- Rail Corridors - The Commission has identified as a priority the need to improve public highway/rail grade crossings in rail corridors where conventional speed passenger trains operate.
- Highway and Pedestrian Grade Separations (Bridges) - The Commission is continually seeking locations where grade crossing blockages cause substantial motorist or emergency vehicle delay, or where heavy vehicular traffic represents a heightened threat of train/vehicle collisions. This Program includes funding assistance for numerous highway/rail bridge projects on local roads and streets throughout the state.

The General Assembly recently gave the Commission authority to utilize the Grade Crossing Protection Fund to assist local communities with the cost of constructing pedestrian grade separations in areas where it is necessary to improve public safety. This Program includes funding assistance for several pedway/rail bridge projects throughout the state.

- Interconnected Crossings - The Commission and IDOT are continuing a program to identify and improve highway/rail grade crossings that require the interconnection of crossing warning signals with traffic control signals at adjacent highway intersections.

Program Note: On January 13, 2000, the Federal Railroad Administration (FRA) issued a Notice of Proposed Rule making to implement the 1994 Swift Rail Act. This federal law and proposed rule would require that all trains sound their horns at all grade crossings, unless supplemental safety measures are installed at those crossings. The FRA issued an Interim Final Rule on December 18, 2003. Pending the outcome of the required comment period, the Final Rule will be effective on December 18, 2004. The Commission anticipates final enactment of the Train Horn Rule will create an increased level of requests for GCPF assistance from local communities to help pay for crossing safety improvements required to create qualified Quiet Zones. The Commission recognizes the need for communities to address quiet zone requirements outlined in the Interim Final Rule. At this time no funding source is available to assist local communities with quiet zone projects. The need to address safety improvements at existing grade crossings is a priority use of the Grade Crossing Protection Fund. However, the Illinois Commerce Commission is willing to work with local communities to identify appropriate improvements that would meet requirements of the Interim Rule.

FY 2005 PLAN

Projects programmed for submittal to the Commission in FY 2005 are listed in Appendix 1. In FY 2005 it is anticipated the Commission will consider projects requiring commitments from the Grade Crossing Protection Fund totaling over \$29 million, including over \$21 million for crossing separations.

In FY 2005, the Commission will also set aside approximately \$1 million in contingency funds to address emergency projects, which may require rapid resolution, and experimental crossing safety projects. These projects are summarized in Table C.

TABLE C		
FY 2005 Projects by Project Type		
Total Est. Assistance from the Grade Crossing Protection Fund		
<u>PROJECT TYPE</u>	<u>CROSSINGS</u>	<u>\$MILLIONS</u>
Bridge Projects	14	15.2
Grade Crossing Improvement Projects	45	6.9
Remote Monitors	N/A ¹	0.5
Experimental/Emergency Safety Improvements	N/A	1.0
Progress Payments for Bridge Projects previously Ordered by the Commission	3	6.2
¹ The number of crossings where remote monitors will be installed has not yet been determined for FY 2005		
Total	62	29.8

NOTE: At the time the FY 2005 portion of the Plan was prepared, funds were available for each project noted in Appendix 1. Grade Crossing Protection Fund assistance may cease for certain projects should the General Assembly fail to appropriate, or otherwise not make available, sufficient funds.

FY 2006 - 2009 PLAN

Projects programmed for submittal to the Commission in FY 2006-2009 are listed in Appendix 2. For those four years, it is anticipated the Commission will consider projects requiring commitments from the Grade Crossing Protection Fund totaling over \$95 million, affecting more than 220 crossings in over 64 counties.

TABLE D**FY 2006-9 Projects by Project Type****Total Est. Assistance from the Grade Crossing Protection Fund**

<u>PROJECT TYPE</u>	<u>CROSSINGS</u>	<u>\$MILLIONS</u>
Bridge Projects	20	28.8
Grade Crossing Improvement Projects	193	33.4
Remote Monitors	N/A ¹	2.0
Interconnects	1	0.2
Experimental/Emergency Safety Improvements	N/A	4.0
Progress Payments for Bridge Projects previously Ordered by the Commission	7	30.3
¹ The number of crossings where remote monitors will be installed has not yet been determined for FY 2006-2009		
Totals	221	96.7

NOTE: At the time the FY 2006-2009 portion of the Plan was prepared, funds were available for each project noted in Appendix 2. Grade Crossing Protection Fund assistance may cease for certain projects should the General Assembly fail to appropriate, or otherwise not make available, sufficient funds.

ACTIVE PROJECTS

The Commission has approved nearly 113 active improvement projects, involving nearly 1,200 crossings in 71 counties throughout the state. These projects are summarized in Table E below. Appendix 3 lists each individual project with specific location and cost information.

TABLE E**Active Projects by Project Type****Amount of Grade Crossing Protection Fund Assistance**

<u>PROJECT TYPE</u>	<u>CROSSINGS</u>	<u>\$MILLIONS</u>
Bridge Projects	20	29.9
